

From its origins, **CREVIN, SA**, dedicated to the manufacturing and commercialization of fabrics, has worked towards achieving the highest quality levels in products as well as in services to ensure the maximum satisfaction and fidelity of its customers.

This fact, along with the commitment towards the protection of the environment, has made us join an integrated management system, following the standards **EN-ISO 9001**, **UNE-EN-ISO 14001**, **UNE-EN ISO 14006:2020** and **Zero Waste by AENOR**, which allow us to assure our purpose inside the scope stated in our management system.

Commitments by Senior Management:

- **Check the correct application of this policy compliant with these international standards** and take the corrective actions when necessary to ensure the efficiency of the management system.
- Ensure that it is appropriate to the **purpose and context of the organization**.
- Study all possible actions for the **continuous improvement** of the Management System, including the environmental performance and eco-designed products, by establishing comprehensive periodic **targets**, monitoring the measurement indicators, follow-up, analysis and evaluation, ensuring that the **integrity of the management system** is maintained also when planning and **implementing changes**.
- Promote the **focus on processes** by providing the necessary **resources** to their employees so that they actively collaborate and the **expected results** can be obtained.
- Promote the focus on **customers and stakeholders** throughout the organization, considering the **risks and opportunities** that may affect the conformity of products and services.
- Satisfy applicable customer, **legal and regulatory requirements** of our products, services, and infrastructures as well as other commitments that the organization underwrites.

Environmental and social commitment:

- Include a **commitment** towards the **protection of the environment** that optimizes the use of natural resources, reducing drinking water consumption, hiring renewable energy sources and minimizing the environmental impacts, such as pollution and waste generation, and **promotes good environmental practices** also for stakeholders. Work to improve the environmental impact of our products, using more sustainable materials (recycled, recyclable), involving our suppliers throughout every stage of the product's life cycle.
- Integrate **circular economy** strategies and use materials of less environmental impact, eco-designing based on Life Cycle Assessment (**LCA**) tools, minimizing impacts from the conceptual design phase of our products.
- Guarantee a safe, inclusive, and respectful working environment, promoting equal opportunities, non-discrimination, and respect for fundamental rights.
- Promote an ethical and responsible relationship with the community and the stakeholders, contributing to a social and sustainable development.

Commitment to responsible governance and financial management:

- Promote the **comprehension and dissemination of this policy** within the organization as well as among its collaborators.
- **Review** the quality, sustainability and governance policy annually, assessing the results of the environmental, social and financial indicators, and adapting the commitments according to the context and the identified risks.
