

Fabric blends from natural and synthetic fibre

Blended fabrics are those that are made from both natural and synthetic fibre. These blends are machine-washable and treated for soil and stain resistance. The stain resistance of natural-synthetic fibre blends prevents liquids and spills from penetrating the fabric's surface. Note that after machine-washing and prolonged use, the effectiveness of this treatment might be reduced.

Stain Removal

1. Treat stains as soon as they occur.
2. Blot spills, liquids or oily stains using absorbent paper.
3. Wipe stains gently with a clean cloth using a solution of lukewarm water with a few drops of neutral detergent. Do not rub.
4. Always treat the stain working from the outside inwards, to avoid the stain from extending itself.
5. When the stain has disappeared let dry at room temperature.
6. Do not use the sofa until the upholstery is completely dry.

Machine-washing

1. Wash the sofa covers inside out and with the zipper closed.
2. When the sofa cover uses Velcro instead of a zipper, attach a protective cloth or strip over the Velcro to avoid damage to the fabric.
3. Use neutral detergents and do not use softener.
4. Wash at the recommend temperature for each fabric (in case of doubt, wash at 30° C), using a washing program with delicate cycle.
5. Use minimum centrifugation (800 rpm).
6. Do not wash with other textiles and do not load the washing machine excessively.

Drying

1. With the cover still moist stretch in both directions.
2. Dry flat at environmental temperature.
3. Avoid direct exposure to sunlight.
4. Always assure that the cover is completely dry before usage.

To evaluate the environmental impact of Crevin fabrics as part of their Life Cycle Assessment (LCA), the following care and maintenance practices are considered:

- Machine wash sofa covers once a year at the recommended temperature.
- Regular monthly vacuuming.
- A product lifespan of 15 years.
